☐ Repeat Horiz ☒ Repeat Horiz
 Repeat Vert ☐ TOTAL SALES Period
 Repeat Vert ☒ [Region] [Amount]

In this table the second column is set to repeat horizontally and the second row set to repeat vertically. The number of repeats is driven by the number of rows and columns in the submitted manuscript.

FIGURE 10a

TOTAL SALES	Q1	Q2	Q3	Q4
East	20,000	30,000	26,000	28,600
South	30,200	38,000	29,500	31,300
North	26,000	25,500	30,000	28,600
West	38,000	25,500	29,500	30,200

This table was created using the format described in FIGURE 10a. It has been automatically expanded to include any number of repeating columns and rows.

FIGURE 10b

☐ Repeat Horiz ☒ Repeat Horiz ☒ Repeat Horiz
 Repeat Vert ☐ TOTAL SALES Period Period
 Repeat Vert ☒ [Region] [Amount] [Amount]

In this table a second repeating column is used to define a repeating alternating pattern. The number of columns drawn is determined by the manuscript data and the second column won't be drawn on the page unless required.

In this table a second repeating row is added to the definition shown in Figure 11a, achieving a more complex alternating pattern. Any number of repeating rows and columns may be defined. It isn't a requirement that each alternating pattern equal a complete instance of that pattern as shown in Figure 11b.

TOTAL SALES	Q1	Q2	Q3

West	38,000	25,500	29,500

This table was created using the format described in Figure 11c and is comprised of alternating columns and rows. The pattern was repeated 1.5x horizontally and 2x vertically.
